COMPONENTS

Hardened Device

Fully trusted devices with built-in security running on reliable bootloader and drivers

Custom-Built OS

Purpose-built privacy by custom OS with security-rich kernel enhancements

Command & Control

Fused central governance with unique security measures to control, track, monitor and alert against cyber threats

Secured Communications

Encrypted voice and messaging, push-to-talk & secured attachments on any Android™ or iOS device

Security Apps

Diverse powerful suite of security tools including threat detection, antimalware and network monitoring

Performance Assurance

Built-in remote control technology & self-troubleshooting app enable remediation & productivity

Employ Trusted Technology

- Reliable hardware; locked bootloader; official drivers & verified integrity;
- Proprietary obfuscation layer across device resources;
- No Google services (an optional hybrid solution);
- OS-fused defense controls across devices;
- Trusted Execution Environment;
- Enhanced data-at-rest encryption;
- Threat intelligence across device, network and application ;
- Remote control technology.

OS	IntactOS based on Android 9
CPU	Octa Core
RAM	3GB
Storage	32GB
Screen	5.7 inch HD+ IPS
Resolution	HD+ 720*1440px; 18:9
Battery	2950mAh
Camera	Front: 8MP; Rear 16MP
SIM	Dual SIM
Fingerprint	Fingerprint Unlock
Networks & Bands	Europe / USA / LATAM / Asia

Securely Communicate

- Fully secure and semi-secure communications; ZRTP; SRTP; TLS;
- AES 256; SHA-384;
- Anti-eavesdropping controls;
- Persistent VPN; a virtual phone number.

Devices By Your Needs

A single console unifies management of all mobile endpoints	
Custom-built device	BYOD
Protect mobile communications and data with the highest security level based on purpose-built Android-like device.	Manage diverse fleet of Android and iOS devices via central console enriched with encrypted communications and support tool-set.
Deployment	
Cloud service	On-premises
Cloud service aligned with IT mobility goals.	On-premises environment to maximize security.
