**LINX** CONNECT & PROTECT YOUR WORKFORCE

NEW FEATURE ALERT!

TASK MANAGEMENT

Introducing LINX Task Management!

Our latest LINX feature, Task Management, enables organizations to coordinate and manage their team activities like never before.
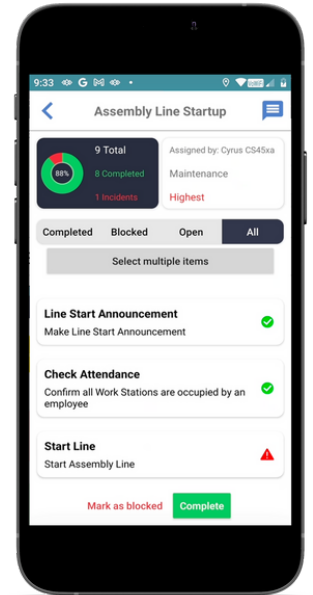

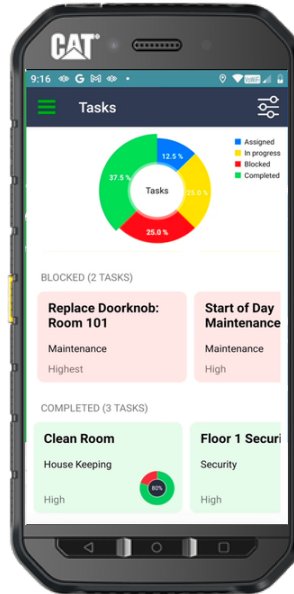

Mobile users receive real time notifications on the LINX mobile app when a new task is assigned to them, and can view all of their current tasks in a simple mobile dashboard.

DISPATCHER — TASK MANAGER

Dispatchers can create and assign new tasks via our Task Management Dashboard, **quickly upload large lists of Items (Sub-Tasks) via CSV files, track progress, view status history, and communicate with mobile users** via dedicated chat for each task.

With Task Management, LINX users can communicate and collaborate more effectively than ever.

LINX mobile **users can work on one or multiple tasks at once, with all task status changes captured with a date-time stamp.** Users can report incidents and attach photos and videos, providing context for the Dispatcher.

They can also chat with the Dispatcher directly in the task they are working on, keeping conversations focused on the task at hand.
