

Carrier-Grade Gigabit Backhaul Made Easy

iBridge B5 Point-to-Point Access Point

The iBridge B5 backhaul radio is the highest capacity unlicensed 5 GHz backhaul solution for short and mid-range link applications such as relay sites, building-to-building settings, and collocation applications. The iBridge B5 is fast, flexible, and incredibly reliable.

Incredibly Fast and Flexible

Recognized as the fastest unlicensed backhaul in the industry. Extensive bandwidth control options, low latency, reserved bandwidth, and GPS sync mode mean peak performance.

Netspan EMS

Integrated into Airspan's Netspan Element Management System to provide full FCAPS network management and an "Always-On" service with front-end web applications and interfaces to interconnect with customers OSS.

Ultra Rugged

Carrier-grade IP67 design allows the B5 to withstand the harshest of environmental conditions.

Just Mount and Go

The integrated high gain antenna and super easy quick mount lets you install in minutes. Also, easily and accurately aim the B5 using the smartphone aiming tool.

Double Reliability

Tames unlicensed spectrum interference via custom engineered multi-channel technology—as good as two smart links in one radio.

Easily Add New Links

Spectrum friendly. Unique, high-precision GPS Sync technology reuses the same channel network-wide. Keep adding more capacity to more sites and waste less spectrum.
