

Mount Your Radios With Ease

FlexiMount + FlexiMount XL

The FlexiMount and FlexiMount XL are pole and surface mount accessories that accommodate both vertical and horizontal pole mounting applications, as well as basic flat wall mounting where minimizing the distance of the radio, relative to the wall, is important. Compared to the FlexiMount, the FlexiMount XL boasts a stronger, more heavy-duty design, a longer pole length and base, and an increased articulation angle of 180°.

Flexible

Suitable for vertical, horizontal, and angled poles, Airspan's FlexiMounts are able to be mounted in any orientation.

Ready-to-Use

Airspan's FlexiMounts come preassembled, right out of the box. They are ready for any backhaul, access point, or radio to be attached to them.

FlexiMount Technical Specification

- **Weight:** 0.43 kg (15.2 oz)
- **Mounting Base:** 45 mm (1.77") x 80 mm (3.15")
- **Pole Length:** 157 mm (6.2")
- **Pole Outside Diameter:** 38 mm (1.5")
- **Articulation Angle:** 105°
- **Mounting Options:** Pole mount with two pipe clamp, or surface mount with two screw hole points
- **Assembly:** Pre-assembled with a white powder coated finish; Mounting screws and pipe/hose clamps not included

Easy and Precise Mounting and Aiming

Advanced J-Mount

Airspan Advanced J-Mount accessory accommodates most under roof eave mounting applications. With an extra axis of rotation to align Airspan's iBridge products to the horizon, the J-Mount provides three degrees of rotation for elevation, azimuth and pole twist adjustment for precise aiming.

Advanced J-Mount Technical Specification

- **Weight:** 0.96 kg (33.8 oz)
- **Mounting Base:** 191 mm (7.52") x 120 mm (4.72")
- **Pole Length:** 355 mm (14")
- **Pole Outside Diameter:** 38 mm (1.5")
- **Mounting Options:**
Surface mount with four screw hole points
- **Assembly:**
Pre-assembled with a white powder coated finish. Includes four (4) 6.35 mm (0.25") lag bolts. Pipe/hose clamps not included.
