MOTOROLA SOLUTIONS

APX™ 8500

ALL-BAND P25 MOBILE RADIO

UNLIMITED MOBILITY.
MAXIMUM CONNECTIVITY.

FIRST RESPONDERS MUST BE READY TO COMMUNICATE AT A MOMENT'S NOTICE IN ANY SITUATION

APX 8500

UNLIMITED MOBILITY. MAXIMUM CONNECTIVITY.

During an emergency - a highspeed chase, massive traffic accident, or natural disaster - public safety officials from different agencies must be able to effectively communicate with each other to coordinate personnel and improve response time.
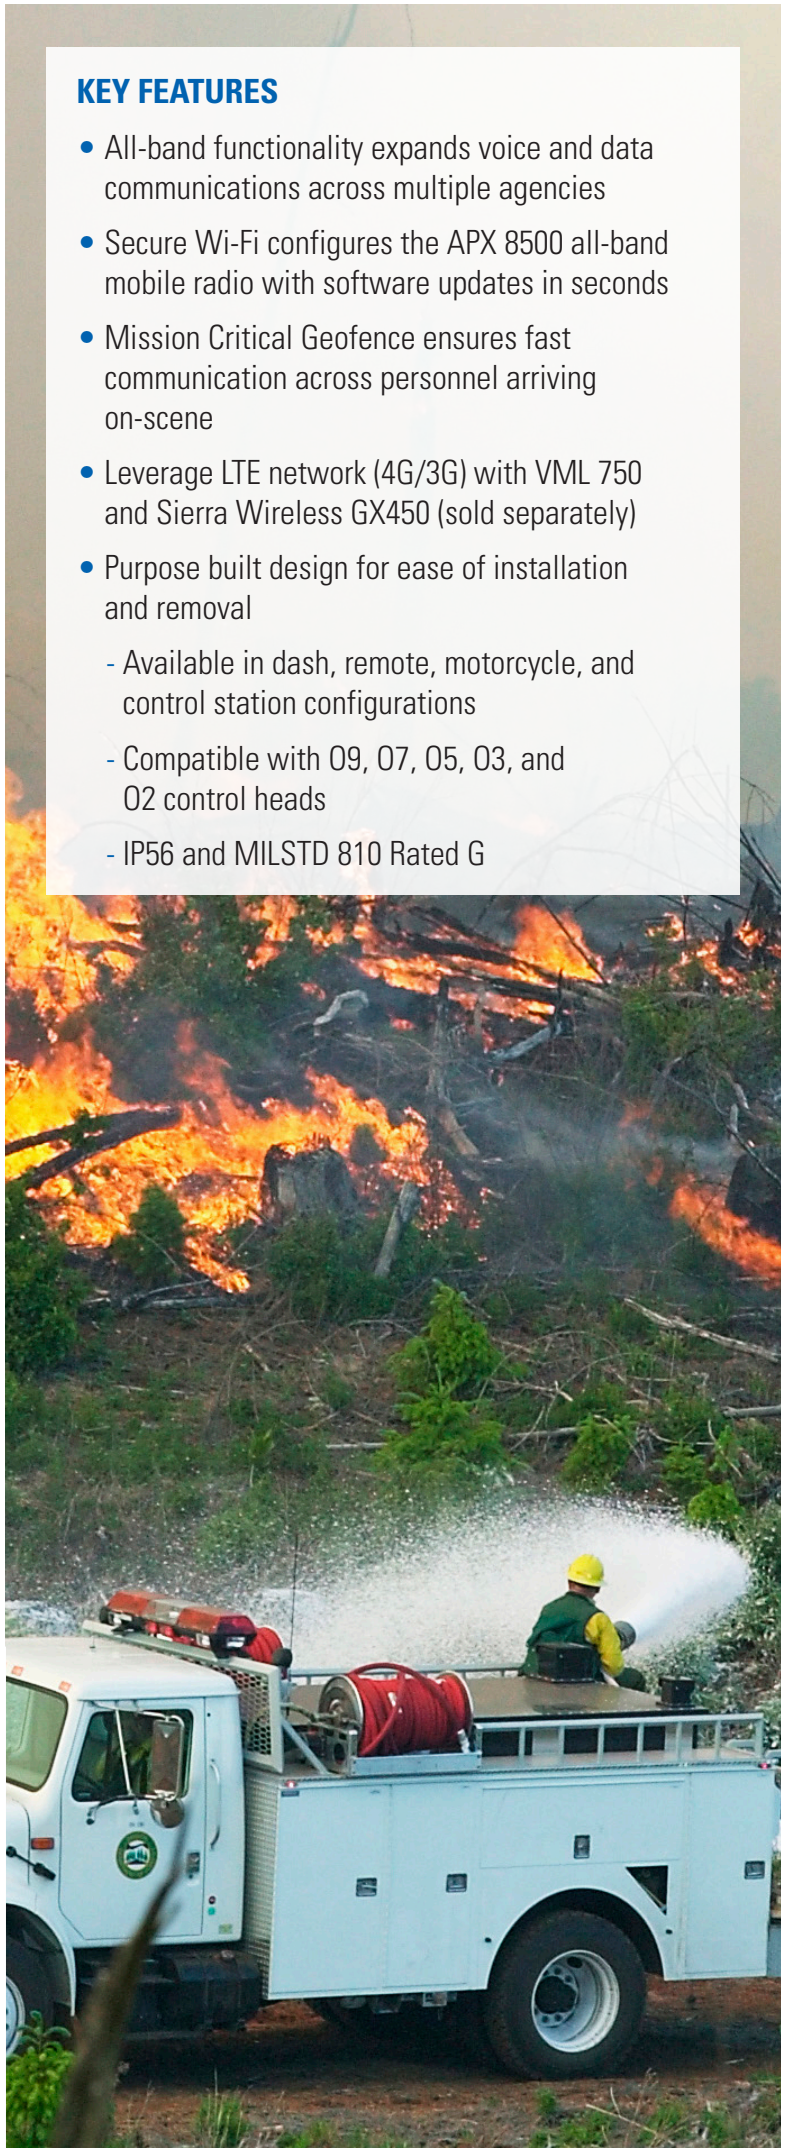

The APX 8500 all-band mobile radio enables first responders to use a single mobile radio to exchange critical voice and data communications seamlessly with multiple agencies and jurisdictions operating on different radio bands.

The APX 8500 combines unlimited interoperability, secure Wi-Fi® connectivity and purpose-built design enabling ease of installation and removal. It can easily connect to the VML750 LTE vehicle modem via micro USB interface and utilize the (4G/3G) commercial network to create an in-vehicle ecosystem for offloading data applications in the field increasing the safety and efficiency of public safety users in and around the vehicle.

KEY FEATURES

- All-band functionality expands voice and data communications across multiple agencies
- Secure Wi-Fi configures the APX 8500 all-band mobile radio with software updates in seconds
- Mission Critical Geofence ensures fast communication across personnel arriving on-scene
- Leverage LTE network (4G/3G) with VML 750 and Sierra Wireless GX450 (sold separately)
- Purpose built design for ease of installation and removal
  - Available in dash, remote, motorcycle, and control station configurations
  - Compatible with O9, O7, O5, O3, and O2 control heads
  - IP56 and MILSTD 810 Rated G

IMPROVE RESPONSE TIMES WITH **THE APX 8500 ALL-BAND RADIO**

ALL-BAND

Unlimited Mobility

With a 4-in-1 mobile radio and an all-band antenna, you now have the ability to stay connected and expand voice and data communications across multiple agencies with one device. Improve response time by instantly operating on digital or analog networks, in 7/800, VHF, UHF Range 1 and UHF Range 2 bands at any given time.

SECURE Wi-Fi

Voice and Data, All at Once

Update your radio fleet without interrupting voice communications with secure Wi-Fi. This dramatically improves the speed of configuring new codeplugs, firmware and software features over-the-air via Radio Management[1]. Agencies can pre-provision up to 20 secure Wi-Fi hotspots so personnel can easily access updates at the facility or in the field.

MISSION CRITICAL GEOFENCE

Seamless On-scene Communication

Ensure fast and seamless communication and collaboration across all responders arriving on a scene. Mission Critical Geofence (also referred to as Enhanced Geoselect) automatically changes a radio's active talkgroup based on its GPS location and an agency-defined virtual barrier. For example, an incident commander can create a geofence around the 3-block radius of a burning building so that all arriving first responders are automatically placed in the same talkgroup.

[1]Radio Management application simplifies APX radio configuration and management by programming up to 16 radios at one time and tracking which radios have been successfully programmed, providing a clear view of the entire radio fleet and a codeplug history for each radio.

APX 8500 All-Band Mobile Radio

VML750 LTE Vehicle Modem

DATA MODEM CONNECTION

Leverage LTE network

The APX 8500 can easily connect to the VML750 LTE vehicle modem via micro USB interface. The VML750 provides cellular carrier network (4G/3G) access so personnel have the flexibility to instantly offload/update the APX 8500 with radio data software applications such as: GPS, OTAR (over-the-air-rekeying), advanced messaging solution (text message), firmware refreshes, flashport, etc. without voice interruption. Fall back on Integrated Voice and Data (IV&D) when the cellular network is unavailable.

PURPOSE-BUILT DESIGN

Ease of Installation and Removal

Since vehicle space is limited for communication equipment, we designed the APX 8500 to allow for all cables to be wired on one side of the mobile, providing additional flexibility for installation. Agencies can also reuse the existing mounting holes, cables and install space of an APX 7500 mobile for easier access, installation and removal. The mid-power trunion was completely redesigned to provide better engagement into the tray and secure grip. The APX 8500 supports dash, remote, motorcycle, and control station configurations.

APX 8500 ALL-BAND P25 MOBILE RADIO
SPECIFICATIONS

RF BANDS

700/800 MHz, VHF, UHF Range 1 & UHF Range 2

9600 Baud Digital APCO P25 Phase 1 FDMA and Phase 2 TDMA Trunking

3600 Baud SmartZone®, Omnilink Trunking

Digital APCO 25, Conventional, Analog MDC 1200, Quick Call II System Configurations

Narrow and Wide Bandwidth Digital Receiver (6.25 kHz equivalent/25/20/12.5 KHz)[1]

STANDARD FEATURES

All-Band Antenna

Up to 3000 Channels

Text Messaging

ASTRO 25 Integrated Voice & Data

Dynamic Zone

Integrated GPS/GLONASS for Outdoor Location Tracking

Single-key ADP Encryption

Software Key

Radio Profiles

Unified Call List

Expansion Slot Standard

Meets Applicable MIL-specs 810C, D, E, F and G

IP56

Reuse of Most XTL/APX™ Accessories

PROGRAMMING

Utilizes Windows 7,8 and 10 Customer Programming Software (CPS) with Radio Management[2]

OPTIONAL FEATURES

Wi-Fi 802.11 b/g/n

Data Modem Connection

Mission Critical Geofence

12 Character RF ID Asset Tracking

Multi-key for 128 Keys and MultiAlgorithm

Programming Over Project 25 (OTAP)

Over the Air Rekey (OTAR)

Digital Tone Signaling

Siren and Light Interface Module

[1] Per the FCC Narrowbanding rules, new products (APX6000 UHFR1, UHFR2) submitted for FCC certification after January 1, 2011 are restricted from being granted certification at 25KHz for United States - State & Local Markets only.

[2] CPS version R12.00.00 and greater ordered after June 2014 will only support Windows 7 and 8.

APX 8500 ALL-BAND P25 MOBILE RADIO
SPECIFICATIONS

SIGNALLING (ASTRO MODE)

Signalling Rate	9.6 kbps
Digital ID Capacity	10,000,000 Conventional / 48,000 Trunking
Digital Network Access Codes	4,096 network site addresses
ASTRO Digital User Group Addresses	4,096 network site addresses
Project 25 – CAI Digital User Group Addresses	65,000 Conventional / 4,094 Trunking
Error Correction Techniques	Golay, BCH, Reed-Solomon codes
Data Access Control	Slotted CSMA: Utilizes infrastructure-sourced data status bits embedded in both voice and data transmissions.
