

# MC-EDGE INTELLIGENT GATEWAY

## EXTENDING PROSPECTS FURTHER, CAPTURING PROFITS FASTER

As more oil and gas operations move to remote areas and amass more data, computing power has to evolve with them in order to optimize and automate operations, maximize security and minimize risk.

The MC-Edge™ Intelligent Gateway makes this possible by merging these varied capabilities into a single versatile solution:

### MC-Edge is an IoT sensor hub

It can connect hundreds of long-life battery sensors, both wired and wireless.

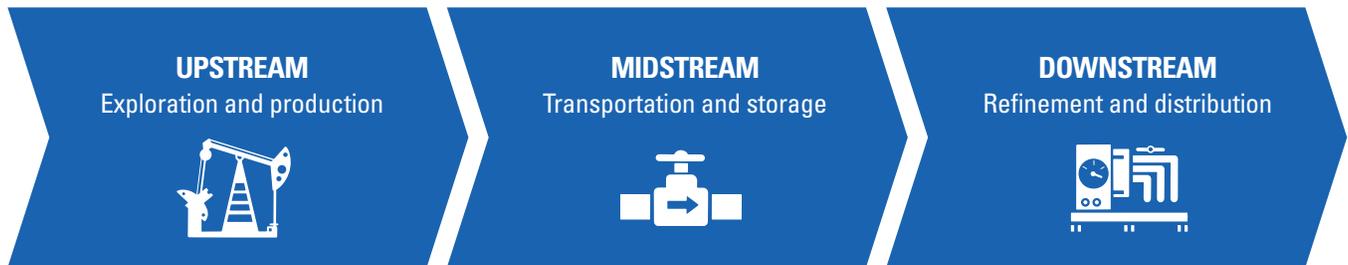

### MC-Edge is a gateway

The system collects and forwards data to centralized applications and servers for analysis and reporting.

### MC-Edge is an intelligent controller

Best-in-class edge computing to collect data and take action when needed.

By processing, sharing and showing the data from end devices in real time, operators onsite and business leaders at HQ have the context needed to ensure productivity, safety and accountability. For oil and gas companies, the next frontier for digital transformation is the edge.

Read the full Solution Brief to learn how Motorola's MC-Edge Intelligent Gateway can help you take advantage of the opportunities of today, and the promise of tomorrow.
